Adding assessment templates from SIMS

Adding assessment templates to Class Charts

If you wish to include custom templates created in SIMS, templates will need to be added to a sub category called class-charts (with Wonde as the main category).

Main Category = Wonde Sub Category = class-charts

This quick start guide demonstrates how to create the required categories and add templates to them.

We recommend creating templates specifically for use with Class Charts and assigning no more than 15 aspects per template. This helps prevent any possible timeout issues between Wonde and SIMS.

The template name(s) must not contain any symbols e.g &, \$, *

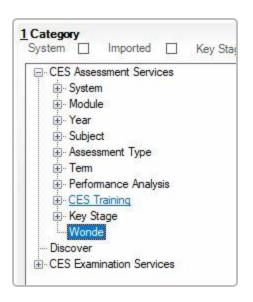

1. In SIMS net, navigate to Tools > Performance > Assessment > Category

<u>Tool</u>	Admissions Lookups Other Schools Setups Housekeeping Academic Management Maintain Medical Event Statutory Return Tools Pupil Premium Check for Update					
	System <u>D</u> iagnostics Per <u>f</u> ormance	>	Ass <u>e</u> ssment	>	<u>C</u> ategory

Please note: Class Charts will only read aspects where **data** is present from the template.

Newly added templates will not appear in Class Charts until the next time Wonde extracts information from SIMS. Usually this takes place during weeknights and will be available to use in Class Charts the following morning.
